PROFILE

QA Test Analyst / Software Tester with 2+ years of commercial experience across banking, hospitality and eCommerce, plus recent UK freelance testing experience. Experienced in manual testing, functional and regression testing, API testing, defect management and test case design across web and mobile applications. Skilled in Jira, TestRail, Postman, SoapUI and SQL, with knowledge of Selenium WebDriver and Playwright. Comfortable working in Agile/Scrum teams and collaborating with developers and Business Analysts.

CORE SKILLS

Software Testing | Quality Assurance | Manual Testing | Functional Testing | Regression Testing | Smoke Testing | Exploratory Testing | Integration Testing | UAT | System Testing | Test Case Design | Test Scenarios | Test Execution | Defect Reporting | Bug Tracking | API Testing | REST API | Database Testing | SQL | Jira | TestRail | Postman | SoapUI | Chrome DevTools | Git | GitHub | Agile | Scrum | STLC | SDLC

PROFESSIONAL EXPERIENCE

Freelance Software Tester | Test IO, UK

2025 – Present

- Test web and mobile applications across different browsers, devices and user journeys.
- Perform functional, exploratory, usability and regression testing.
- Identify defects, edge cases and unexpected behaviour.
- Create detailed bug reports in Jira with reproduction steps, expected/actual results and evidence.
- Retest fixes and perform targeted regression testing.
- Use AI-assisted techniques to support test analysis and coverage.

QA Test Analyst | Cognizant Technology Solutions, India

Jul 2019 – Jun 2020

- Analysed requirements, user stories and acceptance criteria to create test scenarios and test cases.
- Performed functional, regression, smoke, integration, exploratory and UAT testing for banking applications.
- Tested REST APIs using Postman and validated responses, status codes and JSON data.
- Used SQL for backend/database verification.

- Logged, tracked and retested defects using Jira.
- Worked with developers and Business Analysts within Agile/Scrum teams.
- Supported defect triage, release testing and verification of fixes.

Junior Software Engineer – QA | Plotel Solutions, India

May 2018 – Jun 2019

- Designed and executed manual test cases for hospitality applications.
- Tested booking, payment and customer workflows.
- Performed functional, UI, usability, positive, negative and edge-case testing.
- Reported and tracked defects and worked with developers to verify fixes.
- Supported QA documentation and release activities.

Career Break – Childcare, Relocation & Upskilling | UK

Jul 2020 – Dec 2024

Planned career break for childcare and relocation while maintaining and developing QA skills through training in API testing, SQL, Selenium, Playwright, GitHub Actions and AI-assisted testing.
